

On-Site Sewage Facility Grants for Homeowners in the Attoyac Bayou Watershed

Do you have a failing conventional or aerobic septic system?

Do you live within close proximity to the Attoyac Bayou?

In an effort to improve water quality and protect public health, the Angelina & Neches River Authority (ANRA) has grant funding available to install or replace OSSFs that may be contributing to bacteria impairments in the Attoyac Bayou.

You may be eligible for a grant to cover 100% of the costs for the design, permitting, and installation of a new On-Site Sewage Facility (OSSF) in the portions of Rusk, Shelby, Nacogdoches, and San Augustine Counties located within the Attoyac Bayou watershed.

Grants will be awarded based upon proximity to the Attoyac Bayou, distance to Sam Rayburn Reservoir, the condition of the current septic system (no system, failing system, or a system that is not appropriate for the soil type), and household income.

Funding for this project has been made available through a federal Clean Water Act Section 319(h) grant from the U.S. Environmental Protection Agency (EPA) through the Texas Commission on Environmental Quality (TCEQ)
